

Taylor & Francis Group
an informa business

Dear Camila Lobo Coutinho, Tiago Roux Oliveira & José Paulo V.S. Cunha,

I am delighted to inform you of the excellent performance of your article in our Engineering & Technology Readers' Award 2016.

"Output-feedback sliding-mode control via cascade observers for global stabilisation of a class of nonlinear systems with output time delay" received 3411 downloads exclusively through social media channels in the month of September 2016.

Your article ranked 2nd out of 2402 Engineering & Technology articles published by Taylor & Francis and accessed through social media throughout September 2016. This outstanding achievement is testament to the quality and relevance of your research.

Congratulations once again on the success of your article and good luck with your future research.

Kind regards,

Tom Kelly
